A Pillar of Viksit Bharat

The entire Inventure Family is happy to see our Co-Founder & CEO Nooraine Fazal, featured in the Outlook magazine as one of the pillars of Viksit Bharat. The others featured along with her include Dr Devi Shetty, Nandan Nilekani, Ravishankar Bhooplapur, Siddharth Vasudevan, Dr Tansen Chaudhari, Dr Samir Tripathi, Shaktikanta Das, Dr Durga Prakash, Amit Kapoor, Varadhan TR and Ved Prakash Khatri.

The article amplifies Nooraine's contribution to not only the world of education, inclusivity and child safety, but also to research on the impact of Bangalore's urbanisation on its water bodies.

She has been recognized by Education World as one of the '21 Leaders Transforming India's Education' , and identifies actively with the Government's vision of transforming India to the status of a developed nation by 2047.

FI and Drone Wars - where innovation meets competition

The School Hub at Whitefield-Sarjapur thrummed with vibrant energy. It was the culmination of tinkering and passionate brainstorming – the intra-school competition for the 'FI in Schools' and 'Drone War's programs! A curious audience looked on with anticipation, their eyes flitting between the sleek miniature FI cars and the menacingly poised drones.

On one side, the FI teams – the Tyrants, Bolt Racing, Atom Racing, and G12 – huddled together, a mix of nervous energy and steely determination etched on their faces. Plenty of painstaking work, fueled by the thrill of victory, had led them to this very moment. FI and Drone Wars were part of the Beyond Academics Programme.

Across the Hub, the Drone Wars contingent mirrored the FI teams' fervour. Their meticulously crafted drones, testament to countless hours of engineering, sat poised for aerial battle. The qualifying rounds for both competitions were a whirlwind of focused concentration. The FI teams, their miniature machines roaring presented their designs with a passion that belied their age.

This wasn't just a competition; it was a celebration of learning, of defying limitations, and of the unbridled enthusiasm of youth. The School Hub became a crucible of innovation, where the raw emotions of competition ignited a love for STEM. As the final rounds approached, the tension in the air was palpable, but it was tension laced with the thrill of discovery and the shared dream of pushing boundaries. This wasn't just about winning or losing; it was about the journey, the hours spent perfecting designs, and the sheer joy of creation.

Team Atom racing

Dhriti Balaji Mani 6A
Avyaan Luthra Mathur 6A
Krishna Ved Raman 6A
Siddhanth Shyam Sundar 6B
Surya Ingale 6B

Team Bolt Racing

Advik J Singh 6E
Reyansh Pathak 6C
Arjun Singh 6E

The Category award went to Team Atom Racing and the Overall award to Team Bolt Racing. These two teams will represent our school in the FI Nationals in Delhi this July.

Witnessing the magic of Makkala Habba at Whitefield Sarjapur

Our littlest learners stole the show at this year's Makkala Habba, Over 160 Preschool and Kindergarten students aged 3-6 took centre stage, leaving the audience charmed with their talent.

This year's performance wasn't just about celebrating the end of the school year. It was a heartwarming story about the two majestic Pipal (*sacred Fig*) trees(around 50 years old) and a Neem tree (around 20 years old)on our Inventure Whitefield-Sarjapur Campus.

The show transported us back to 2017, when the Sarjapur community rallied to save trees from being cut down for road widening. Their incredible efforts, including a crowdfunding campaign, resulted in two Pipal trees and one Neem tree being lovingly transplanted to our campus. An amazing story of what love and concern for our environment can achieve.

The performance highlighted the importance of teamwork and environmental stewardship – a message beautifully conveyed by our young performers. It was a delightful reminder that even the smallest hands can make a big difference.

The People tree and movable stage props are a major contribution from the Middle and Senior school students who used their Beyond Academics and Choice Project periods to create this gorgeous tree which depicts the four seasons in four different art styles: Kerala Mural Art, Oriya Pattachitra, Madhubani and Warli art. And of course, it used mainly recycled, repurposed Primary Production props - so fitting for today's theme of working together to make a difference.

The entire production was a collaborative masterpiece. The adorable jute invitations were crafted by our preschoolers, while the kindergarteners collaborated on the stunning title banner. Makkala Habba truly embodied the spirit of working together to make a difference.

Congratulations to all our performers and a big thank you to everyone who helped make this year's Makkala Habba so special!

Young Minds Take a Stand for Sustainability-Makkala Habba Celebrations at the Yeshwantpur Campus

Inventure Academy, Yeshwanthpur echoed with energy on 4 April, when Makkala Habba was celebrated. Makkala Habba provided a platform for children to showcase their talents in dance, music and drama. It was also a celebration of learning and teamwork, transforming the school into a stage for young voices.

Our learners staged a play, centred on a story about four Grade 5 students who wanted to make the most of their summer break, by exploring the country with the idea of meeting people of different tribes and learning how they lived a sustainable life. The four friends meet members of the Kuruba and Soliga tribes of Karnataka, the Koli tribe of Maharashtra and the inhabitants of a Bhil village in Gujarat. They are fascinated at how these diverse tribes and villagers lived in harmony with nature and they decided that they would draw on this experience to create a more sustainable lifestyle and set an example for others to follow. The four friends concluded that they could collectively create a more green and clean Bangalore and also solve the current problem of water scarcity.

This wasn't just an ordinary day, it was a life-skills odyssey for these young minds. Watching them embrace sustainability on stage was a glimpse into the future changemakers we have the privilege of nurturing.

A Trip to the Post Office

Last week, our kindergarteners at Yeshwanthpur Campus embarked on a heartwarming adventure, exploring the theme of 'community helpers'. Their journey took them deep into the fascinating world of the post office. We were lucky enough to welcome a real-life postmaster to our classroom, who captivated the children with tales of how the post office works its magic.

But the learning didn't stop there. Eager to experience the thrill of sending mail firsthand, we whisked the little ones away on an unforgettable field trip to the local post office. Parents, brace yourselves – you might be receiving some special deliveries soon.

With the excitement bubbling over, the children wrote messages to their loved ones on postcards. Watching them choose colourful stamps and witness the fascinating sorting process – postcards destined for faraway lands, packages ready for new adventures – was pure magic. It was a learning experience they won't soon forget.

This trip wasn't just about mail; it was about sparking a love for learning and fostering a sense of community in our youngest explorers. So, when you receive a precious handwritten note from your child, remember the journey it took – from classroom adventure to real-life experience. It underscores the power of experiential learning and the joy of discovery.

Countdown to Summer Camp: One Week Left to Join the Inventure Adventure!

Inventure Preschool

TINY STEPS TO BIG ADVENTURES.

JOIN US FOR A SUMMER OF PLAY AND FUN

ACTIVITIES

- DANCE - DRAMA
- RECREATIONAL GYMNASTICS
